PROFILE

I am a newly graduated engineer aiming to specialize in **System Administration, Network Security,** and **Vulnerability Management**. I have extensive experience in **configuration, system hardening,** and **security automation,** predominantly on Linux-based systems. Through my work with the **ALTAY** (Siber Vatan) team, I have built a strong technical foundation in both system **infrastructure and offensive/defensive security** processes. My goal is to advance my career as an ethical hacker and security expert who identifies vulnerabilities and produces solutions to ensure system continuity, data integrity, and robust security.

EDUCATION

Manisa Celal Bayar University (3,48)
Computer Engineering (English) | 2022 – 2026
Cigli Fen Lisesi

EXPERIENCE

NordisGlobal Siber Güvenlik A.Ş. | Blue Team Intern (Feb 2026 - Jun 2026)
- **Active Directory** management and **System Hardening** - Log tracking, security, and analysis - Security **automation solutions** utilizing **Ansible** and **n8n** - Log Security, **Analysis**, and **Correlation**

VulnHero Bilisim A.S. | Cybersecurity Software Engineer Intern (Jun 2024 – Jul 2025)
- Developed automation for cybersecurity projects using **Python**
- Actively participated in **vulnerability research** and data collection processes

ALTAY Team | Siber Vatan (2023 –)
- Deployed and managed **Wazuh** agents, performing MITRE ATT&CK aligned **log correlation** and **alert analysis.**
- Conducted **malware detection** and **incident response** simulations through **YARA** integration and active response.
- Implemented **system hardening**, **service configuration**, and privilege restriction on **Linux systems**.
- **Analyzed and remediated** suspicious processes, services, and network connections for persistence and backdoor detection.
- Configured **network security** measures—including **VLANs, firewall rules, and traffic analysis** (**Wireshark**)—to achieve network segmentation and reduce the attack surface.
- Hardened images, **configured security policies**, and managed lab setups using **Vagrant** within **VMware** and **Docker** environments.
- Automated **system administration** and **configuration management** workflows utilizing **Ansible**.
- Detected **system anomalies** and executed **event analysis** (KAPE, Hayabusa, etc.) within **Active Directory** LAB environments.

MCBU IT Community | Sponsorship Team Member (2023 – 2026)

TECHNICAL SKILLS

Systems & Infrastructure: Linux, Active Directory, VMware, VirtualBox, Vagrant, Docker
Automation & Scripting: Bash, Python, Ansible, Jenkins, n8n
Security & Networking: System Hardening, Network Configuration, Wireshark, Wazuh, YARA
Databases: PostgreSQL

TRAINING & PARTICIPATION PROGRAMS

- Advanced Python Programming (BTK Academy)
- Ethical Hacking and Basic Linux Training (Siber Vatan)
- Penetration Testing Training (Siber Vatan)
- Malware Analysis Training (Siber Vatan)
- Web Security Training (Siber Vatan)
- CCNA – Introduction to Networks | Enterprise Networking, Security & Automation | Switching, Routing, and Wireless Essentials (Netacad)
- LetsDefend – SIEM Engineer Career Path | SOC Analyst Learning Path | Malware Analysis Skill Path
- DevSecOps Processes Training (Siber Kulupler Birligi) (CI/CD)
- XDP EBPF | LKD 2026 Winter Camp

COMPETITIONS, PROJECTS & OTHER EXPERIENCES

- Participation in Siber Vatan Cybersecurity Camp 2024 | Turk Telekom Cybersecurity Camp 2025
- Lightweight SOAR System Project (ongoing)
- Participation in Teknofest Hackmasters, STMCTF, and Mini Hacker of Clash competitions
- Teknofest – AI-Based Early Diagnosis of Breast Cancer Project (UMMS)
- Erasmus Plus – Germany (2014–2015)
- ABSim-LDH (Agent-Based Simulation and Machine Learning Project for the Analysis of Herniated Disc Treatments)
- EMBRA (eBPF-Based Cyber Security Project - Ongoing | ALTAY)

LANGUAGE

English (Intermediate - Advanced)

SKILLS & INTERESTS

Public Speaking | Adaptability | Photography | History
